Dark matter is a hypothetical form of matter that is thought to account for approximately 85% of the matter in the universe, and about a quarter of its total energy density. The majority of dark matter is thought to be non-baryonic in nature, possibly being composed of some as-yet undiscovered subatomic particles. Its presence is implied in a variety of astrophysical observations, including ...

Amsterdam has a long and eventful history. The origins of the city lie in the 12th century, when fishermen living along the banks of the River Amstel built a bridge across the waterway near the IJ, which at the time was a large saltwater inlet. Wooden locks under the bridge served as a dam protecting the village from the rising IJ waters, which often flooded the early settlement.
