Cognitive analytic therapy (CAT) is a form of psychological therapy initially developed in the United Kingdom by Anthony Ryle. This time-limited therapy was developed in the context of the UK's National Health Service with the aim of providing effective and affordable psychological treatment which could be realistically provided in a resource constrained public health system.

Functional analysis in behavioral psychology is the application of the laws of operant and respondent conditioning to establish the relationships between stimuli and responses. To establish the function of operant behavior, one typically examines the "four-term contingency": first by identifying the motivating operations (EO or AO), then identifying the antecedent or trigger of the behavior ...

This post was so helpful! I am struggling right now with assigning Habits of Work grades to my Spanish students in middle and high school. I was using an analytic rubric for both my assessment and the students' self-assessment, but it's possible the quantity of words was exacerbating the problem of students scoring themselves in the best column out of reflex or habit.
